

Our very best advice:

Listen to the voice of a new generation

PLMA 2018

Meet us at PLMA 2018
Hall 12/Hollandhal
Stand no. N-903

Smaller and reusable packaging,
efficient cleaning, natural materials
and do not involve animals – at all!

Nopa Nordic is a leading manufacturer of private-label detergents, laundry powder technology, cleaning products and products for personal care. This obligates us to be constantly aware of new trends and able to develop new products, services and production methods to match them.

For that reason we listen carefully to our trendspotters and scientists in our R&D department. And they got news for us all: The new generation has high demands.

Therefore we are now introducing recycled packaging made from used fishing nets bringing us closer to a circular economy.

The Nopa Nordic Family are also introducing **Waves** for both household care and personal care. It's efficient, natural, vegan – and very very nordic.

For the young urban originals we present the ideal household brand: **Urban Original**. It's modern. It's efficient. It's in smaller packages and dispensers. And most of all: It's the answer to a new generation.

Re-Ocean

WAVES

Urban
Original

Nopa Nordic is the preferred partner when it comes to product development, professional feedback, sustainable production, and competitiveness.
